

# Care equipment right on your doorstep

Nursing Hygiene is a specialist distributor and provider of products for care homes. Nursing Hygiene is based in a large unit at Oakhurst Business Park in Southwater, near the RSPCA building, and the lower floor of this huge unit is home to a huge showroom of specialist care products, equipment and furniture. Anyone is welcome to drop by and browse the latest, state-of-the-art designs, but many people are not aware that the showroom exists! Nursing Hygiene stocks a

huge range of products, meaning you can view and get a feel for specialist beds, chairs, wheelchairs, motorised scooters and rehabilitation equipment. There's no need to look through brochures and base your purchase on pictures - the products are all there for you to see at the showroom. You can see products such as the new Vario fully adjustable wheelchair, which is taking the care sector by storm! The Vario wheelchair is quickly altering the face of wheelchair

provision in the UK. Another innovative product is the Integralift, a unique patient-lifting solution that folds neatly away into fitted cabinets when not in use. With a wide range of cabinet colours and finishes, you'll find that the carefully engineered Integralift leaves the patient feeling safe and comfortable and the operator confident and relaxed. You can see all these products by visiting the showroom at Charwood House, Oakhurst Business Park, Southwater, RH13 9RT.

The products are all there to view  
at the Southwater Showroom
